

The EPA has proposed changes that will fundamentally impact how professional rodent control is conducted, effectively eliminating responsible usage of the most successful form of rodent control... rodenticides.

**ALL Rodenticides, including Block and Soft bait forms, will become RESTRICTED USE PESTICIDES (RUPs) in sizes 4lbs and up:**

**Licenses to Apply Bait are Mandatory**

**Rules by State will Vary**

**Point of Sale Reporting**

- Requires anyone purchasing or applying rodenticide to be a certified applicator OR be working under the supervision of a certified applicator
- Some states require supervising certified applicators to be available by phone when PMPs are applying bait, while others require them to be onsite within visual contact of the applicator
- Distributors will need to do reporting (confirm licenses and communicate back to the state) for each and every sale of rodenticide, by applicator

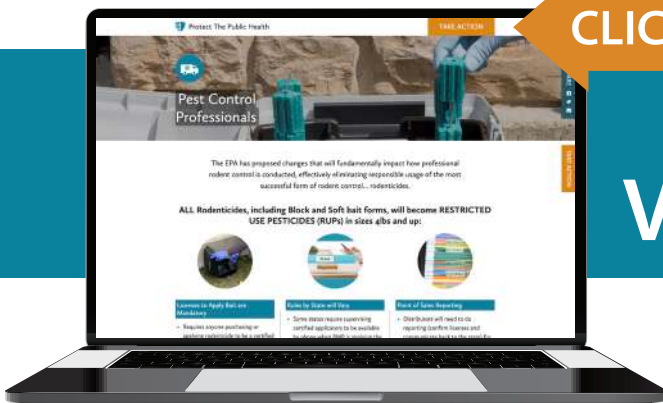

**WHO WANTS MORE RATS?**  
Rodent populations & food contamination are increasing  
- THIS WILL MAKE IT WORSE
