

Frequently Asked Questions

What information does Target Specialty Products need in order to enter my license(s) onto my own account?

For accurate input of licenses we need your account number. If you do not know your account number, and you have received a letter from the Licensing Department, your account number is located on the right hand side next to your business address information. We also need a copy of your license that clearly shows the license number, expiration date, and licensee name (for CA customers, be sure to send a copy of your Restricted Materials Permit including the second page where the pesticides are listed). You can also call Customer Service for help.
